

SUPASPAN

SUPERSIZED SHUTTERS

**1300mm wide
Basswood panel**

The widest timber
shutter on the market.

Superior style and construction

Available in a range of painted colours, the Supaspan range perfectly matches the look of our standard-sized Basswood louvre wooden shutters.

Supaspan has also been developed using re-enforced mortice and tenon joints, as well as highly engineered blades to ensure these will not twist or warp with age.

- 1,300mm wide panels for sliders and hinged panels, far surpassing the standard 1,080mm for sliders and 950mm for standard hinged shutters
- Only available in painted colours with Supatilt or Clearview tilt mechanism
- Manufactured to our highest quality standards in our MYT factory
